INDIANA LIMESTONE
COMPANY

CUSTOM STONE

Fabrication Capabilities

Indiana Limestone Company brings quality, precision, and innovation to your dimensional cut stone needs. The genuine natural beauty of Indiana Limestone, the breadth of our cut stone facilities, and the depth of our architectural stone expertise, enable us to supply any size architectural stone project. Your customers demand the best and we have the knowledge that will help you exceed their expectations. Our craftsmen follow the most current practices endorsed by the Indiana Limestone Institute of America.

The cornerstone of our fabrication business is the skill and experience we bring to cutting and shaping limestone with precision and consistency. Employees with centuries of combined experience work in our fabrication plant. In addition to the latest innovations in production, our dimensional cut stone services are built upon the foundation of the time honored skills found at Indiana Limestone Company.

Color, Grade, and Finish

Indiana Limestone Color for Specification

Indiana Limestone is typically thought of in the colors listed below. Because of our vast resources and reserves at Indiana Limestone Company, these color options are available in more subtle variations to match most every project need. We offer architects, builders, and fabricators a versatility that is unmatched by any other supplier of limestone.

Buff: Traditional buff color ranging from cream to light brown with some veining and grain movement visible in the face.

Full Color Blend: A natural compilation of the full range of buff to light gray shades with the same great subtle veining.

Silver Buff: Clean buff color with a subtle silver colored veining in the foreground.

Gray: Varies in color from light to dark shades of gray with visible veining in the face.

Variogated: An unselected mixture of buff and gray tones with a wide range of grain structure and veining.

Indiana Limestone Grades for Specification

Grade classifications for Indiana limestone are based on the degree of fineness of the grain particles and other natural characteristics that make up the stone. The structural soundness of each grade of Indiana Limestone is essentially identical.

Select: Fine grained stone having a controlled minimum of inclusions and veining.

Standard: Average to large grained stone permitting an average amount of inclusions and veining.

Rustic: Large to coarse-grained stone permitting an above average amount of inclusions and veining.

Indiana Limestone Finishes for Specification

Below are examples of the most popular finishes offered from Indiana Limestone Company. Through our wide selection of colors, grades, sizes, and finishes we assure that all aesthetic and structural requirements of the most demanding projects are met. Indiana Limestone Company offers the broadest range of color, grade, and finish and we match that offering with excellence in customer service.

4-cut Finish

A linear, geometric finish by machine. 6-cut finish also available.

Abrasive Finish

A flat, slightly textured surface finish for limestone.

Broached Finish

Machine plucked, rough texture, ribbed finish.

Bush-hammered Finish

A flat, semi-rough textured surface finish for limestone.

Rock Faced

Rough finish achieved through hand dressing of the stone.
